Attn: Alfred Pollard, General Counsel

I for one stand by a Call for Action for Solar Done Right....

We need better policies for local, democratic, distributed generation, including the adoption of Feed-in Tariffs.

Everybody talks about "thinking out of the box, be innovative"... All I see is the same old programs in this country.

If it is all working so well, why are we in such a state of confusion and mess??

Lets get it together people and build a future. Quit the politics...We the people are tired of it.
