Subject: RIN 2590-AA53 - Restore PACE programs now

Mar 16, 2012

General Alfred Pollard

Dear General Pollard,

[Please withhold my email and home addresses from the public record.]

I urge the Federal Housing Finance Agency to restore Property Assessed Clean Energy (PACE) programs that help property owners like me make energy efficiency and renewable energy upgrades to our homes, businesses and factories.

PACE programs reduce energy use, encourage systems that produce renewable energy in situ. This reduces the impact on the infrastructure, use of fossil fuels, and air pollution. What's not to like?? We reduce energy dependence, get air it is safe to breathe, give the infrastructure relief from over use, prevent outages during peak use periods while lowering utility bills. -- And CREATE JOBS IN THE U.S. FOR US!

Sincerely,

Ms. Barbara George
